# PAVING – SURVEY METHODOLOGY

Step 1
Pre-Survey App Set-up

1) Download the App **'Runkeeper'.**
   (Available as a free download on the Apple App Store and Google Play Store).

2) Make sure your **GPS** is turned ON.

Step 2
Pre-Survey App Set-up

1) Open the app and click the **Log In** button in the bottom right corner.

2) Key in the following credentials -
   Email – wqsdata@janaagraha.org
   Password – password10
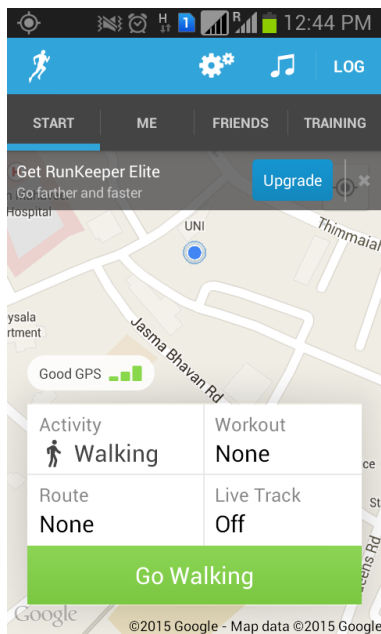

Step 3
Pre-Survey App Set-up

1) Choose the **Settings icon** () from the blue band on top of your main screen.
2) Select **'Audio Cues'**.
3) Select '**Distance Trigger'**
4) Select an option (0.25km/0.5km/1km etc.) closest to the length of the street you have chosen to survey.
5) Return to the main RunKeeper Screen.

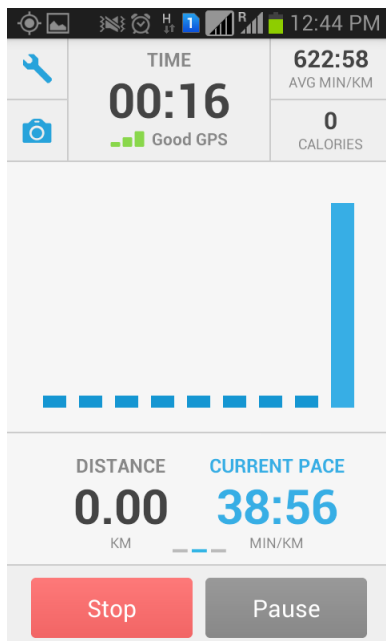

Step 4
During the Survey

Select the '**Go Walking'** option and walk along the selected street.

Step 5
During the Survey

1) When you come across an unpaved portion of the road, click '**Pause'**.

2) After pausing, choose the **Camera Icon** in the left hand corner, and take a picture of the unpaved portion of the road.
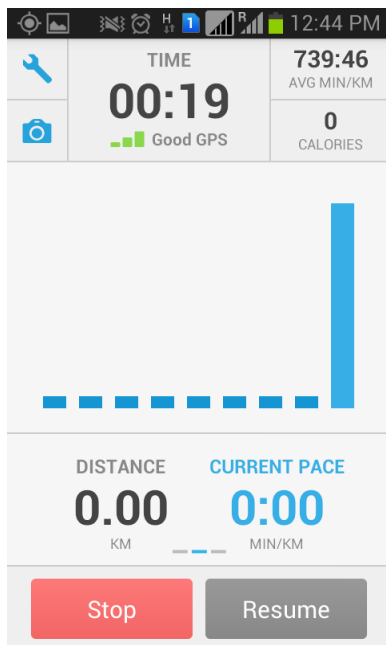

Step 6

During the Survey

1) Make sure you select the **'Resume'** button as soon as you are back on the paved portion of the road.

2) Repeat steps 5-6 every time you come across an unpaved portion.

***Incase there is no unpaved portion along the entire road, do not follow steps 5-6.

Step 7

During the Survey

Select the **'Stop'** button when you reach the end of the selected street.

Step 8
During the Survey

In the notes section, type **P** (to denote 'Paving') and save.
