- **Ward**

An administrative division of a city that typically elects and is represented by a councillor or councillors. There are 198 wards in Bengaluru City, falling under the purview of the Assistant Engineer (AE), in each ward.

- **Sub Division**

An administrative division, falling under the purview of the Assistant Executive Engineer (AEE). There are 60 Sub-divisions in Bengaluru City.

- **Division**

- **Civic Facilities**

The assets/facilities that BBMP by notification is directly or indirectly (by contract) responsible for, are called civic facilities.

- **Arterial Roads**

An arterial road is a high-capacity urban road. These roads along with expressways, serve as the principal network for through traffic flows. They generally service significant travel within the city between central business districts and outlying residential areas or between major suburban centres.

- **Sub-arterial Roads**

Sub-arterial roads are similar to arterial roads, but carry less of the through-traffic. They perform the function of a principal carrier of traffic to, through and around major facilities (eg: major shopping centres, town centres, major business and/or industrial areas, large educational establishments etc.)

- **Collector Roads**

Collector roads collect traffic from local roads and feed it to the arterial and sub-arterial roads or vice-versa. They are generally located in residential neighbourhoods and small industrial or market areas.

- **Local Roads**

Local roads are intended primarily to provide access to abutting properties and normally don't carry high volumes of traffic. Majority of trips in urban areas either originate from or terminate on these roads.

- **Lux**

Lux is the SI unit of illuminance, measuring luminous flux per unit area. Simply, it is the intensity of light, as perceived by the human eye, which hits or passes a surface.
